Multiplication Operation Instructions

<u>SYNTAX</u>	<u>ENCODING</u>	<u>DESCRIPTION</u>
ED	1111 11mm A1xx 00ii iiji jjii	computes $(A-B)^2$
EDAC	1111 11mm A1xx 00ii iiji jjaa	computes $(A-B)^2 + C$

M bits- specifies register containing multiplication source operand
A bit- specifies destination location for square result
i bits- specifies register containing a difference operand, such as minuend
j bits- specifies register containing a difference operand, such as subtrahend
x bits- specifies destination location for difference result
